

**Agenda**  
**Distributed Generation Workgroup Meeting**  
**January 27, 2006**  
**10:00 a.m. - 12:30 p.m.**

- 1. Welcome and Introductions**
- 2. DG Technology Review Activities from June 2004 to January 2005**
  - **Surveyed manufacturers with certified technologies**
  - **Compiled inventory of certified DG units in CA**
  - **Evaluated South Coast Air Quality Management District microturbine database**
  - **Conducted an ARB microturbine usage survey**
  - **Held two source test conference calls to discuss calibration gases and NMOC methods**
  - **Compiled waste gas composition**
  - **Compiled waste gas test data**
  - **Compiled data on CHP use**
  - **Met with California Energy Commission to discuss dairy biogas energy projects and other DG projects**
- 3. Preliminary Concepts for Amendments to DG Certification (as discussed at January 2005 meeting)**
  - **Requiring only 100 percent load testing**
  - **Derating microturbine power ratings, for the lb/MW-hr determination, by 15% due to ambient conditions**
  - **Adding NMOC test method**
  - **Changing CHP credit**
  - **Adding waste-gas standards**
- 4. Update on Recent ARB Activities**
- 5. Next Steps**
  - **Timeline for regulatory development (October 2006 Board date)**
  - **Gather any additional information on CHP use and waste-gas emissions data**
  - **Review district rules for possible modifications to guidelines**
  - **Next meeting in March: date TBD**
- 6. Adjournment**
